

## Senior DevOps Kubernetes Engineer

GaliaIT – Banja Luka

Job type: Full - time

### Company description

GaliaIT is a startup consulting company, our client is a Swedish manufacturer of network cameras for the physical security and video surveillance industries.

As an early member of our DevOps team, you'll have a unique opportunity to shape the company's product roadmap and business operations. To Thrive in the high-energy environment of a young company where openness, collaboration, risk-taking, and continuous growth are valued. With flexible working schedule and remote / or hybrid work environment.

### About the role

You will be responsible for providing a first-class and agile support service to our Managed Kubernetes and Managed DevOps customers.

### Key Duties & Responsibilities:

- Experience building, managing, troubleshooting, and upgrading production-grade Kubernetes clusters, ideally on private cloud in addition to public cloud offerings such as AWS EKS or Azure AKS.
- Experience with cluster bootstrapping and orchestration tools such as Kubeadm or Rancher.
- Experience building, managing, troubleshooting, and upgrading production-grade Kubernetes clusters, ideally on private cloud in addition to public cloud offerings such as AWS EKS or Azure AKS.
- Experience with cluster bootstrapping and orchestration tools such as Kubeadm or Rancher.

### Qualifications

- Strong development background in Golang or Python
- Strong Kubernetes expertise as a user and developer
- Experience within Rancher or Ansible
- Preferably a university/master degree in Mathematics or Software Engineering
- Excellent communication in English - written and spoken
